INVESTMENT STRATEGIES: The AMC uses a "passive" or indexing approach to try and achieve Scheme's investment objective. The corpus of the Scheme will be invested predominantly in stocks constituting the Underlying Index in the same proportion as in the Index and endeavor to track the benchmark index. A very small portion (0-5% of the Net Assets) of the Scheme may be kept liquid to meet the liquidity and expense requirements.

The performance of the Scheme may not be commensurate with the performance of the Underlying Index on any given day or over any given period. Such variations are commonly referred to as the tracking error. The Fund intends to maintain a low tracking error by closely aligning the portfolio in line with the index. The stocks comprising the Underlying Index are periodically reviewed by NSE Indices Limited. In the event of involuntary corporate action as listed in SEBI Circular CIR/MRD/DP/32/2012 dated December 6, 2012, the fund shall dispose the security not forming part of the Underlying index within 30 days from the date of allotment/ listing.

Equities and equity related instruments:

The Scheme will invest in stocks comprising the Underlying Index and endeavor to track the benchmark index.

Fixed Income Securities:

The Scheme may also invest in money market instruments having residual maturity upto 91 days, in compliance with Regulations to meet liquidity requirements. Money Market Instruments include commercial papers, commercial bills, treasury bills, and Government securities having an unexpired maturity upto one year, call or notice money, certificate of deposit, usance bills, TREPS and any other like instruments as specified by the Reserve Bank of India from time to time, subject to regulatory approvals.

In case of dissolution of the Underlying Index, the Trustees reserve the right to modify/alter the terms of the Scheme to reflect any other index that may be deemed appropriate.

Implementation of Policies

The Scheme, in general, will hold all of the securities that comprise the respective underlying Index in the same proportion as the index. Expectation is that, over time, the tracking error of the Scheme relative to the performance of the respective underlying Index will be relatively low.

The Investment Manager would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the respective underlying Index.

Investment Process

The Scheme will track the underlying Index and is a passively managed scheme. The investment Decisions will be determined as per the Underlying Index. In case of any change in the index due to corporate actions or change in the constituents of the Underlying Index (as communicated by NSE Indices), relevant investment decisions will be determined considering the composition of the underlying Index. The Investment decision of the Fund will be carried out by the designated Fund Manager.

SCHEME SPECIFIC RISK FACTORS:

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect Scheme's NAV, trading price, yield, total return and/or its ability to meet its objectives.

Risks associated with investing in Equities:

While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. The liquidity of the Schemes' investments is inherently restricted by trading volumes in the securities in which it invests.

The value of the Scheme's investments, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Governments, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down.

Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Schemes to make intended securities purchases due to settlement problems could cause the Schemes to miss certain investment opportunities.

The schemes will also be vulnerable to movements in the prices of securities invested by the schemes which again could have a material bearing on the overall returns from the schemes.

Market Risk

The Scheme's NAV will react to the stock market movements. The Investor could

lose money over short periods due to fluctuation in the Scheme's NAV in response to factors such as economic and political developments, changes in interest rates and perceived trends in stock prices and market movements, and over longer periods during market downturns.

Market Trading Risks

- **Absence of Prior Active Market:** Although units of the Scheme are listed on the Exchange, there can be no assurance that an active secondary market will develop or be maintained.
- **Lack of Market Liquidity:** Trading in units of the respective Scheme on the Exchange may be halted because of market conditions or for reasons that in the view of the Market Authorities or SEBI, trading in units of the respective Scheme is not advisable. In addition, trading in units of the Scheme is subject to trading halts caused by extraordinary market volatility and pursuant to NSE/BSE and SEBI "circuit filter" rules. There can be no assurance that the requirements of the Market necessary to maintain the listing of units of the Scheme will continue to be met or will remain unchanged.
- **Units of the Scheme may trade at Prices other than NAV:** Units of the respective Scheme may trade above or below its NAV. The NAV of the Scheme will fluctuate with changes in the market value of Scheme's holdings. The trading prices of units of the Scheme will fluctuate in accordance with changes in their NAVs as well as market supply and demand of units of the respective Scheme. However, given that units can be created and redeemed only in Creation Units directly with the Fund, it is expected that large discounts or premiums to the NAVs of the Scheme will not sustain due to arbitrage possibility available.
- **Regulatory Risk:** Any changes in trading regulations by the Stock Exchange/s or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/ discount to NAV. Although, the units are listed on NSE/BSE, the AMC and the Trustees will not be liable for delay in listing of Units of the Scheme on the stock exchanges / or due to connectivity problems with the depositories due to the occurrence of any event beyond their control.
- **Settlement Risk:** In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities as in certain cases, settlement periods may be extended significantly by unforeseen circumstances. Similarly, the inability to sell securities held in the Scheme portfolio may result, at times, in potential losses to the Scheme, and there can be a subsequent decline in the value of the securities held in the respective Scheme's portfolio.
- **Right to Limit Redemptions:** The Trustee, in the general interest of the Unit holders of the Scheme offered in this Document and keeping in view the unforeseen circumstances / unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day. The same shall be in accordance with SEBI circular dated May 31, 2016 - SEBI/HO/IMD/DF2/ CIR/P/2016/57 (Restriction on redemption in Mutual Funds).

Portfolio Concentration Risk

To the extent that the Scheme may concentrate its investments in the securities of certain companies/ sectors, the Scheme will therefore be subject to the risks associated with such concentration. In addition, the Scheme may be exposed to higher levels of volatility and risk than would generally be the case in a more diverse fund portfolio of equity securities. Such risks may impact the Scheme to the extent that it invests in particular companies/sectors even in cases where the investment objective is more generic.

Volatility Risk

The equity markets and derivative markets are volatile and the value of securities, derivative contracts and other instruments correlated with the equity markets may fluctuate dramatically from day to day. This volatility may cause the value of investment in the Scheme to decrease.

Redemption Risk

All direct transactions in units of the Scheme by MMs/APs or other eligible investors with the AMC/the Fund shall be at intra-day NAV based on the actual execution price of the underlying portfolio.

Any order placed for redemption or subscription directly with the AMC must be of greater than INR 25 Cr. The aforesaid threshold shall not be applicable for APs/MMs and shall be periodically reviewed.

The threshold of INR 25 crores for direct transaction in the units of the Scheme with the AMC shall be effective from November 1, 2022. Investors can therefore transact in the units of the Scheme directly with the AMC in the respective creation unit size as applicable in the SID.

Passive Investments

The Scheme is not actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its Underlying Index regardless of their investment

merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets.

Tracking Error Risk

The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. The tracking error may vary due to various reasons mentioned below or any other reasons that may arise and particularly when the markets are very volatile.

Factors such as the fees and expenses of the Scheme, Corporate Actions, Cash balance, changes to the Underlying Index and regulatory policies may affect AMC's ability to achieve close correlation with the Underlying Index of respective Scheme. The Scheme' returns may therefore deviate from those of their Underlying Index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the index and the NAV of the respective Scheme. Tracking Error may arise due to the following reasons: -

- Expenditure incurred by the Scheme.
- The funds may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions of securities in the index.
- Any delay experienced in the purchase or sale of shares due to illiquidity of the market, settlement and realization of sale proceeds and the registration of any securities transferred and any delays in receiving cash and scrip dividends and resulting delays in reinvesting them.
- The underlying index reflects the prices of securities at close of business hours. However, the Fund may buy or sell the securities at different points of time during the trading session at the then prevailing prices which may not correspond to the closing prices on the exchange.
- The potential for trades to fail which may result in the Scheme not having acquired shares at a price necessary to track the index.
- The holding of a cash position and accrued income prior to distribution and accrued expenses.
- Disinvestments to meet redemptions, recurring expenses, dividend payouts etc.
- Securities trading may halt temporarily due to circuit filters.
- Corporate actions such as rights, merger, change in constituents etc.
- Rounding off quantity of shares underlying the index.
- Index providers undertake a periodical review of the scrips that comprise the Underlying Index and may either remove or include new scrips. In such an event, the Scheme will endeavour to reallocate its portfolio but the available investment opportunity may not permit absolute mirroring immediately.

Risk associated with Investing in money market instruments

- **Interest Rate risk:** This risk is associated with movements in interest rate, which depend on various factors such as government borrowing, inflation, economic performance etc. The values of investments will appreciate/depreciate if the interest rates fall/rise.
- **Credit risk:** This risk arises due to any uncertainty in counterparty's ability or willingness to meet its contractual obligations. This risk pertains to the risk of default of payment of principal and interest
- **Liquidity risk:** The liquidity of a security may change depending on market conditions leading to changes in the liquidity premium linked to the price of the security. At the time of selling the security, the security can become illiquid leading to loss in the value of the portfolio

Risks associated with investing in Tri Party Repo through CCIL (TREPS):

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments.

CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall".

As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members.

Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

However, it may be noted that a member shall have the right to submit resignation from the membership of the Security segment if it has taken a loss through replenishment of its contribution to the default fund for the segments and a loss threshold as notified have been reached. The maximum contribution of a member towards replenishment of its contribution to the default fund in the 7 days (30 days in case of securities segment) period immediately after the afore-mentioned loss threshold having been reached shall not exceed 5 times of its contribution to the Default Fund based on the last re-computation of the Default Fund or specified amount, whichever is lower.

Further, it may be noted that, CCIL periodically prescribes a list of securities eligible for contributions as collateral by members. Presently, all Central Government securities and Treasury bills are accepted as collateral by CCIL. The risk factors may undergo change in case the CCIL notifies securities other than Government of India securities as eligible for contribution as collateral.

Risks associated with Securities Lending:

Securities lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities

borrowed.

The risks in security lending consist of the failure of intermediary/counterparty, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the intermediary/counterparty. Such failure to comply can result in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the approved intermediary. The scheme may not be able to sell lent out securities, which can lead to temporary illiquidity & loss of opportunity.

Investors are requested to refer to section "How will the Scheme allocate its assets?" for maximum permissible exposure to Securities Lending & Borrowing.

Apart from the risk factors mentioned above, the scheme is exposed to certain specific risks, which are as mentioned below -

- Performance of the underlying Index will have a direct bearing on the performance of the Scheme. In the event when the index is dissolved or is withdrawn, the Trustee reserves a right to modify the Scheme so as to track a different and suitable index and appropriate intimation will be sent to the unitholders of the Scheme.
- Tracking errors are inherent in any ETF and such errors may cause the Scheme to generate returns which are not in line with the performance of the Index or one or more securities covered by / included in the Index.
- In case of investments in derivative instruments, the risk/ reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares and there is a risk attached to the liquidity and the depth of the index futures market as it is relatively new market for Index and also it is relatively less popular as compared to the Index.
- In the event of the index mentioned above, is dissolved or is withdrawn by NSE Indices Limited (NSE Indices) or is not published due to any reason whatsoever, the Trustee reserves the right to modify the Scheme so as track a different and suitable index or to suspend tracking the Nifty till such time it is dissolved/ withdrawn or not published and appropriate intimation will be sent to the Unitholders of the Scheme. In such a case, the investment pattern will be modified suitably to match the composition of the securities that are included in the new index to be tracked and the Scheme will be subject to tracking errors during the intervening period.

Risk management strategies

The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in equity markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks of investing in equity and designed risk management strategies, which are embedded in the investment process to manage such risks.

Risk & Description	Risk mitigants / management strategy
Market Risk: The Scheme is vulnerable to movements in the prices of securities invested by the respective Scheme, which could have a material bearing on the overall returns from the Scheme. The value of the underlying Scheme' investments, may be affected generally by factors affecting securities markets, such as price and volume, volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets.	Market risk is inherent to an equity scheme. Being a passively managed scheme, it will invest in the securities included in its Underlying Index.
Liquidity Risk: The liquidity of the Scheme' investments are inherently restricted by trading volumes in the securities in which they invests.	As such the liquidity of stocks that the scheme invests into could be relatively low. The fund will try to maintain a proper asset-liability match to ensure redemption / Maturity payments are made on time and not affected by illiquidity of the underlying stocks.
Tracking Error risk (Volatility/ Concentration risk): The performance of the respective Scheme may not be commensurate with the performance of their underlying Index viz. Nifty 50 Index on any given day or over any given period.	Over a short to medium period, scheme may carry the risk of variance between portfolio composition and Benchmark. The objectives of the Scheme are to closely track the performance of the Underlying Index over the same period, subject to tracking error. The Scheme would endeavor to maintain a low tracking error by actively aligning the portfolio in line with the index.

Risks associated with Debt investments	
Risk & Description	Risk mitigants / management strategy

<p>Market Risk: As with all debt securities, changes in interest rates may affect the Scheme's Net Asset Value as the prices of securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than do short-term securities. Indian debt markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.</p>	<p>The Scheme may invest primarily in money market instruments having a residual maturity upto 91 days thereby mitigating the price volatility due to interest rate changes generally associated with long-term securities.</p>
<p>Liquidity or Marketability Risk: This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM).</p>	<p>The Scheme may invest in government securities and money market instruments. The liquidity risk for government securities, money market instruments is generally low.</p>
<p>Credit Risk: Credit risk or default risk refers to the risk that an issuer of a fixed income security may default (i.e., will be unable to make timely principal and interest payments on the security).</p>	<p>Management analysis will be used for identifying company specific risks. Management's past track record will also be studied. In order to assess financial risk a detailed assessment of the issuer's financial statements will be undertaken.</p>
